PROFESSIONAL SUMMARY

Results-driven software engineer with 2+ years of experience in developing robust banking and e-commerce solutions. Proficient in Java, Spring Boot, Angular, and IBM BPM, with a strong background in RESTful API development, UI/UX design, and application performance optimization. Adept at collaborating with cross-functional teams to deliver scalable and efficient software solutions. Passionate about problem-solving and eager to contribute to innovative IT systems in the banking and financial domains.

Education

HMRITM, Delhi, India

2018-2022

- HMR Institute of Technology and Management ,
Affiliated with GGSIPU
Bachelor of Engineering in Information and Technology
GPA: 8.7 (Aug. 2018 – July 2022)

Professional experience

Programmer Analyst

Cognizant, Gurgaon, Haryana

Nov 2022 – Jan 2025

- Developed and maintained banking software solutions using Spring Boot and Java, ensuring high performance and scalability.
- Designed and implemented RESTful APIs for seamless integration with client and third-party systems, improving system interoperability.
- Enhanced user interfaces using HTML, CSS, and JavaScript, ensuring responsive and intuitive designs.
- Collaborated with cross-functional teams to optimize application performance, reducing load times by 20%.
- Gained in-depth knowledge of financial transactions and banking domain requirements, contributing to the development of secure and efficient software.

Intern

Cognizant, Gurgaon, Haryana

Apr 2022 – Nov 2022

- Trained in IBM BPM (Business Process Management) and developed a web project using HTML, CSS, JavaScript, and IBM BPM.

- Managed business processes and middleware applications, improving system efficiency by 15%.
- Monitored application performance and implemented solutions to reduce downtime.

Intern

Vac Global Education, Patel Nagar, Delhi

July 2021 – Oct 2021

- Utilized Bootstrap and CSS for responsive and mobile-first web development.
- Contributed to a real-time web project by developing the result view module, enhancing user experience.

Projects

Leave Application System

- Developed using IBM BPM, JavaScript, HTML, and CSS.
- Features: Auto-approval, manager approval, and real-time updates, streamlining the leave management process.

Your Mart (E-commerce Platform)

- Built an e-commerce grocery shopping platform using Angular, Firebase, and RazorPay API.
- Key Features:
 - Single-page functionality for seamless navigation.
 - Real-time cart management and user profiles.
 - Integrated online and COD payment options.

Park and Go (Parking Management System)

- Developed a car and scooter parking management system using Java, XML, QR Code Scanner API, and RazorPay API.
- Key Features:
 - No-contact entry and exit for enhanced safety.
 - Pre-booking and real-time parking slot allocation, reducing wait times by 30%.

Technical Skills

- **Programming Languages:** Java, JavaScript, C++, C, MySQL, HTML, CSS
- **Frameworks & Tools:** Spring Boot, Angular, Bootstrap, IBM BPM, Android

- **Skills:** RESTful API Development, UI/UX Design, Application Performance Monitoring, Problem-Solving, Team Collaboration

Certifications & Achievements

- **HackerRank:**
 - 5-Star in C++ and Java.
 - 3-Star in Problem Solving.
- **CodeChef:** 2-Star with a rating of 1527 (Highest: 1623).
- Solved 300+ competitive programming problems on platforms like LeetCode.

Additional Information

- Strong understanding of IT infrastructure, middleware, and application monitoring.
 - Eager to contribute to banking IT systems and manage complex projects efficiently.
 - Willing to relocate and serve across India as required.
 - Languages: Hindi (Native), English (Professional Proficiency).
-
